# EFFECTIVE SPECIALIST IN CUSTOMIZED SELF ADHESIVE TAPES

## ANTI NOISE

To eliminate noise, vibration and harshness within the interior of modern cars, Stokvis Tapes has developed a wide range of tapes, including velour, felt, non-woven, PTFE and UHMW-PE to name just a few.

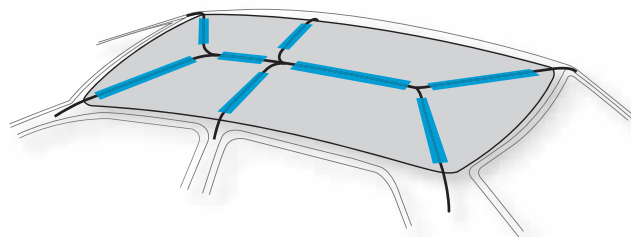

## PROTECTION

More and more interior and exterior parts of cars have to be protected temporarily during production or transit. With a wide range of protection films we are able to fulfil all your requirements.

## HEADLINING

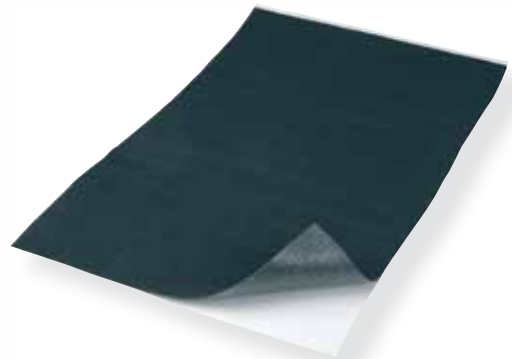

Cables and other parts have to be fixed into place on the inner side of a headliner. Single sided materials are available to prevent rattling as well as double sided tapes or foams which have been sold since 1988 for this application. Flat form cables (FFCs) must be fixed into place onto the difficult headliner surfaces, using very special double sided tapes that have been specially developed by Stokvis Tapes.

## CARPET LAMINATION

With a wide selection of double-sided tapes combined with some very unique and wide laminators we make the carpet lamination process for our customers much quicker, safer and more cost effective.

## STOKGUARD

'Stokguard' is a permanent protection tape. It is a very clear, conformable and strong PUR film that protects the car body against stone chipping, scratches and other mechanical influences. A superior UV-resistance and excellent resistance to chemicals, moisture and ageing makes 'Stokguard' absolutely perfect for all kind of vehicles such as cars, busses, trucks and bikes.

## BONDING

Stokvis Tapes offers a comprehensive range of high quality tapes for attaching two materials together: Double-sided foam tapes, structural bonding tapes (SBT-acrylic foams), transfer tapes, double-sided tissues and filmic tapes. Some examples of applications include: Body side mouldings and badges, seat heating elements, temporary mounting of windscreens and mounting of rubber and plastic profiles. Very common are kiss-cut parts with finger lift for quick and easy assembling which helps to improve line efficiencies.

## CUSTOMIZATION

Stokvis Tapes has the experience, the knowledge and the machinery to present all tapes in the format of our customer requirements. Jumbos, logs, rolls and kiss or die-cut parts with one or a few laminated materials are just part of our day-to-day business that helps our customers to optimize their production and to reduce costs.
