

STOKVIS TAPES

Effective solutions

Stokvis Tapes for Effective solutions

Stokvis Tapes are "The Largest Independent Tape Specialist" in Europe. With branches in 15 countries, Stokvis Tapes are at the forefront of developments and innovative solutions in the Tape Industry.

Guaranteed quality

Tape is a small but often essential part of a product or production process. Minor deviations can have major consequences affecting your quality, production and costs. Stokvis Tapes therefore ensures:

- Innovative cost effective solutions, tailored to your individual needs
- Fast and efficient service
- Extensive range of "high quality" products
- "One stop Shopping", Stokvis Tapes can provide all your tape requirements
- A local approach with an international strategy
- Consistent high quality and service throughout the world

There's always a solution

Our technical consultants can provide solutions in all fields of application, including joining, protection, insulation, sealing and packaging. For these purposes we have over 1500 different types of tape products. We also have a modern laboratory where we can test new products and applications – in accordance with your specifications, of course. This service saves you time and money and reduces risk.

Stokvis Tapes can reduce your costs and help improve your production process

You can reduce costs with Stokvis Tapes. By offering exactly the right tape solution, we can help you to increase production output and minimize production waste. Further cost savings can be generated with our combination of purchasing power, technical know-how and independent advice.

The quality you demand

Stokvis Tapes complies with your quality requirements, product specifications and tolerances. We are certified in accordance with the ISO 2000 standard and some of our branches now have an ISO 14001 environmental certificate as well.

For specific markets with very high technical requirements such as medical, graphics, electronics, automotive, mobile communications, aviation, paper, and construction, we work to the exacting standards that apply in these lines of business.

Stokvis' products have a favourable price-quality ratio. The quality is always appropriate but is never unnecessarily too high for the intended purpose.

Customisation

Stokvis Tapes supplies tailor-made products. This enables you to work faster, minimize waste and develop innovative products.

Cutting:

Single and double-sided tapes can be cut quickly into widths ranging from 2 mm to 1500 mm. We also supply extra-long rolls for semi-automatic or fully automatic tape application.

Die-cutting:

This can be done in any size, shape and model, in both small and large quantities. To speed projects we can produce test sample shapes quickly, using our specialised "in house" equipment for initial tests and approval.

Laminating:

Stokvis Tapes can make all products self-adhesive even Silicone! Presented in sheet, roll or bobbin form. We can also provide products with a protective plastic film or metal foil.

Printing:

We can print tapes with your own name, logo and website address and can also provide marking and security tapes.

Application:

The tapes can be applied to your products for you. For large series we use fully automatic machines.

On-time deliveries

The logistic process of Stokvis Tapes is geared towards fast, timely deliveries. We keep hundreds of products in stock at our local warehouses. We also ensure that all documents are presented in accordance with your wishes and any local requirements. To avoid the risk of non-availability, we can stock certain products especially for you. We can also offer various tailor-made logistic solutions to improve your order progression and delivery.

International service

Our international customers can make use of our IKA programme. With this tailor-made solution we can offer all your branches the same consistent quality, service and pricing.
